

INNOKET.10

WHITEPAPER

Version 1.0

1. ABOUT

Innoket is a marketplace where idea, subjects, topics, articles and opinions is our priority. The idea behind this system is pretty simple. Most of the problems faced by many investors are the unavailability of the right field and scheme to put investments in. The fund is available for investment but no idea on what to invest in which made us to come up with this idea marketplace which gives many investors a very wide range of business opportunities to invest into to yield massive profits.

On Innoket you get to be paid for dropping a particular idea article. It is a platform that turns user's information, opinion and ideas into products that can be sold on the platform to earn a particular amount the user agrees to sell the product. As soon as you make a publish, interested buyers will contact and buy your published work. This platform gives you the access to chat with interested clients during the process of sale of a particular idea, this makes the buyer get full information of the idea and additional advices to be given by the seller.

Innoket - Am innovative market place for all which focus mainly on normal people, their approaches, ideas and inventions.

Real Time Scenarios:

1: Someone from the village who has an innovative idea in farming. A rich farmer sees that and adopts the same by giving him money to get access to his/her idea and innovation.

2: Young scientists who discovered something but there is no exposure for what they have done.

3: If you have some mathematical formulae/approaches, safe place to save it and whenever they want they can publish publicly and also edit and update data.

4: People who has good knowledge can't show it to world because of restrictions. For such kind of people, we keep some challenges to encourage the people.

2. FEATURES

- **Compile, Edit, Modify and Store your Product**

Gathering of your information is one of the major things to do regarding your post, once compiled you can take a doublecheck to make sure you have no bug and if there is any you can easily make corrections and store your piece to get it ready for publishing.

- **Publish Compiled Information**

Once you have crosschecked your post and you are sure it's ready to go for sale then there is no reason to keep your product unpublished so as to get buyers get access to buying your idea pack.

- **Sell and Buy Idea Articles**

Once your piece has been successfully published, you wait for just some few moments to get your buyer and make transaction done on time. Buyers have access to browse all available products and can buy as many products at the same time seamlessly.

- **Payments made in IKT**

All Payments and transactions are to be completed with our Innoket Coin to ensure swift and seamless payment flow on the platform.

3. FORUM

Innoket has a forum with wide range of Classified advisors with great ideas from all around the world where you can make friends and work together on our platform to achieve more great goals.

4. CHALLENGES

Challenges will be given occasionally on the platform to motivate the users of this great innovation and bounties will be provided to those who solves the challenges given.

5. PAYMENTS

You have deliver your work on time, then your payment has no reason to be delayed. That's why on Innoket we have created an inbuilt escrow system to make sure every transaction is done professionally and without delays. So, there is no reason to delay your funds from getting to you. All payments are made in **Innoket Coin (IKT)**.

210000 IKT	1%	for Developers/Marketing
210000 IKT	1%	for Masternode Sale
Remaining	98%	for MN Rewards/Staking/Mining

10. WHY INNOKET?

There are some ICO's which raised millions of dollars just for development of website or infrastructure. Do you really think millions of dollars are required to build those?

1: No ICO

There is no ICO for building Innoket market place, but we are selling 1% of the total coins for masternodes.

2: Quark Algorithm

Quark is super secure and uses a different hashing algorithm with 9 rounds of hashing from 6 unique hashing functions (blake, groestl, blue midnight wish, jh, SHA-3, skein). It is the one used in the Proof of Work. Because of Quark, IKT is ASIC resistant.

3: Low Supply

Innoket coin is developed with low supply of 21million, which will help to create the demand.

4: MasterNodes & Privacy

MasterNodes allows a sure and stable network with a copy of the blockchain stocked in each node. Also, it helps in stabilizing supply and demand.
